# FELUCCA

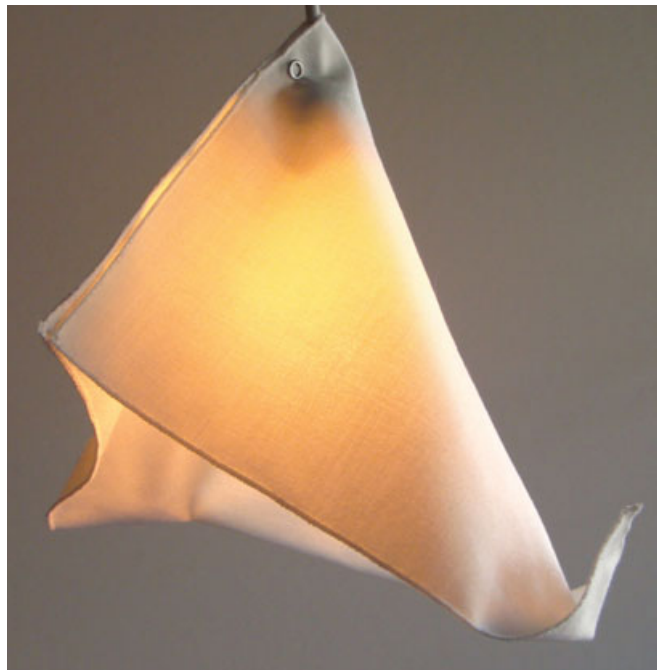

Felucca is made out of flat decorative NOMEX® fabric. The fabric is made in the EU to the highest standards. Unlike other fabrics, NOMEX® is protected against heat Up to 200°C (392°F) and flame EN 532:1995-01 therefore, it is safe to mount directly on the light bulb.

NOMEX® fabric has excellent fibres properties, creating a soft and elegant appearance. The fabric glows smoothly around the light bulb and cast a stylish light on the environment.

Felucca size is 33 x 24 it can double it's size 33 x 48 thanks to the snap fasteners. by joining two Fellucca pieces together. it also changes it's shape, and therefore the shade shape and light spread gets a different dimention.
